

PROTECT YOUR PRIVACY

AI-6600 Phone Tap Detector - This small portable device powered by your phone line will detect series and parallel taps in your phone, phone jack, d-mark point, out on the pole, and in the transformer box. The unit will also detect if someone is trying to eavesdrop from an extension phone. Upon detection you will be alerted with a visual LED indication thus providing you an opportunity to end your phone call or continue to speak at your own risk. Doesn't detect infinity bugs. Works on single line phones only.

Made in USA Dimensions: 4" x 2" x 1.75" Warranty: 1 Year

\$295

AI-2100 Vibrating Transmitter Detector - This handheld or easily concealed unit powered by a 9-Volt battery will detect AM, FM, and UHF body-wires and transmitters that are transmitting between the range of 1 to 2000 MHz. The unit has a detection range of up to 8 feet depending on the output power of the transmitter. The stronger the transmitter, the further it can transmit, the further away this unit can detect and vice versa. The AI-2100 will silently vibrate upon detection alerting only the user and not everybody else around to the presence of the detected transmitting device.

Made in USA Dimensions: 2" x 3" x .75" Warranty: 1 Year

\$295

AI-680 Portable White Noise Generator - Designed for the individual that wants to go one step beyond the detection of room transmitters or body wires. This unit will effectively mask the transmission of any room transmitter or body wire by generating impossible to filter white noise. The AI-680 will protect an area up to 125 square feet as well as protect the user from laser microphones aimed at their windows. This volume controlled, battery powered white noise generator takes detection to the next level.

Made in USA Dimensions: 2.5" x 4" x 1.5" Warranty: 1 Year

AI-5500 Complete Safety System - By integrating the technologies of our AI-6600, AI-2100, and AI-680 into one system, a person can easily protect themselves from most surveillance devices. No longer will you have to worry about if your phone is tapped, if there is an infinity bug on your line, if your office is bugged, or if an associate is really a spy wearing a wire for your competition. Powered by your phone line and a wall transformer this system will detect phone taps, infinity bugs, room transmitters, and body-wires, as well as mask the transmission of a room transmitter or body-wire by generating impossible to filter white noise. Doesn't detect Tape Recorders or Video Cameras.

Made In USA Dimensions: 8" x 4" x 1.75" Warranty: 1 Year

AI-2700 Advanced Micro RF Bug Detector - Smaller than a pager and weighs only ounces, this Advanced Micro RF (Radio Frequency) Bug Detector will detect any AM, FM & UHF Body-Wire, Room Transmitter & Infinity Bug that transmits between the frequencies of 50MHz to 4GHz (4000MHz). Detection range is up to 10 feet, depending on the output power of the transmitter. The stronger the transmitter the greater the detection range. The AI-2700 is more sensitive than most large size professional sweeping systems yet small enough to be easily concealed for stealth detection. Each unit is individually calibrated and tested ensuring reliability. Knowing when your being monitored or bugged has never been easier with the use of our Advanced Micro RF Bug Detector.

Made in USA Dimensions: 1.25" x 2" x .5" (w x h x d) Warranty: 1 Year
